Address:

5025 Bradford Drive, Alabama, United States 35806

Description:

Advanced Aerospace Tooling (AAT) has an experienced staff of highly skilled engineers and manufacturing personnel, including a management team with extensive experience in the aerospace research and development industry. At AAT we take great pride in being able to provide our proprietary, state of the art, high strength resin (AT²LAS™) to the aerospace, marine, and other industries. AT²LAS™, which we pour to net, is ideal for use in rapid prototyping, high temp (425° F) autoclave curing of composites, injection and blow molding and other tooling. Initial testing has indicated that AT²LAS™ has specific ballistic protection properties as well. As our product is water, chemical and corrosion resistant we are evaluating marine and on-wing applications.
