Address:

5021 Technology Drive Northwest Suite B1, Alabama, United States 35805

Description:

Founded in 2001, JHNA is a highly qualified technical engineering firm focused on warfighter to engineer interface as related to the development of JMR and Future Vertical Lift capabilities. Our Associates have the operational, engineering, and technical expertise to ensure common context with warfighters, engineers, and acquisition decision makers. We are sought out not only for the value we add to the research & development and acquisition processes, but also because of our continuous JMR/FVL-related work, dating back to 2009, that spans from OSD to PEO Aviation and AMRDEC.
