» US Army Corp of Engineers

Address:

5021 Bradford Drive, Alabama, United States 35805

Description:

The U.S. Army Corps of Engineers has approximately 37,000 dedicated Civilians and Soldiers delivering engineering services to customers in more than 130 countries worldwide.

With environmental sustainability as a guiding principle, our disciplined Corps team is working diligently to strengthen our Nation's security by building and maintaining America's infrastructure and providing military facilities where our servicemembers train, work and live. We are also researching and developing technology for our war fighters while protecting America's interests abroad by using our engineering expertise to promote stability and improve quality of life.

US Army Corps of Engineers

We are energizing the economy by dredging America's waterways to support the movement of critical commodities and providing recreation opportunities at our campgrounds, lakes and marinas.

And by devising hurricane and storm damage reduction infrastructure, we are reducing risks from disasters.

Our men and women are protecting and restoring the Nation's environment including critical efforts in the Everglades, the Louisiana coast, and along many of our Nation's major waterways. The Corps is also cleaning sites contaminated with hazardous, toxic or radioactive waste and material in an effort to sustain the environment.

Through deeds, not words, we are BUILDING STRONG.
